DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

WEBINAR On Overview of WI-FI Technology

A webinar was conducted under IEEE student chapter with Branch code STB17311 by the Department of ECE on "Overview of WI-FI Technology" by G. Sireesha, R & D Engineer at Broadcom Corporation, Bangalore. It was conducted on 12-06-2021.

The webinar was all about an overview of WI-FI technology and the career opportunities in that domain. Firstly, Sireesha gave us a brief on WI-FI technology and its use in the present era. She also explained why it is expanding these days. Later, she explained how he got into this field and her journey through it.

At the end of the webinar, an interactive Q&A session was organised in which sir addressed to the questions of the students about the webinar she delivered. Some of the questions where about why we should know about this technology, which companies are working on this technology, how to approach the companies and the salary structure in the domain etc.

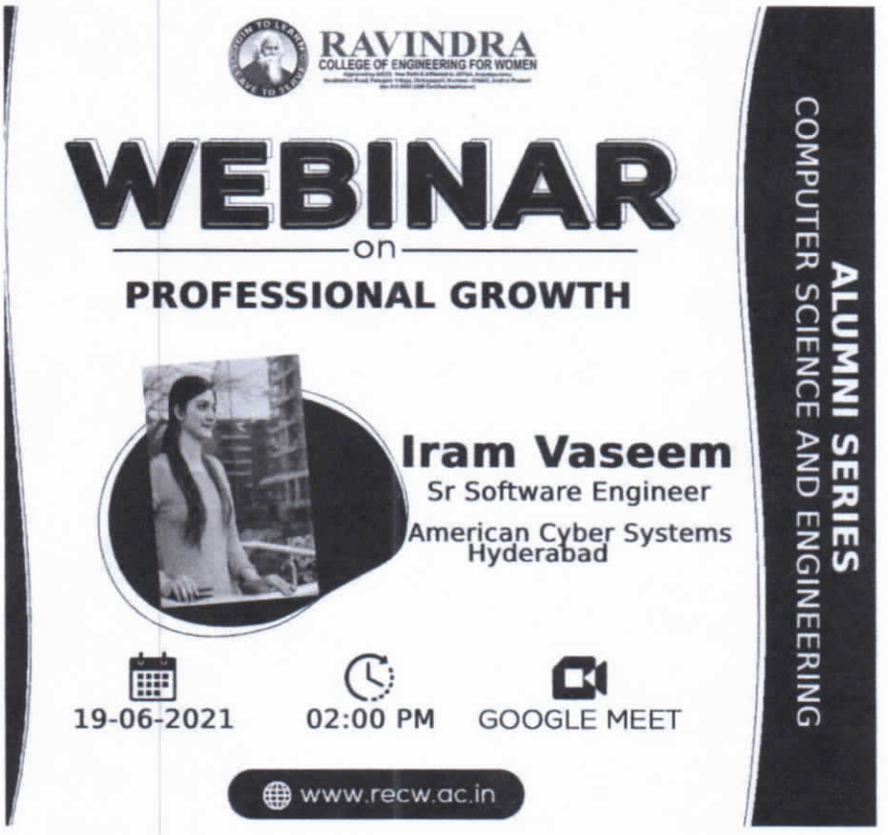
REPORT ON VIRTUAL WEBINAR - "PROFESSIONAL GROWTH"



The department of CSE organised an online webinar with Ms Iram Waseem, a former student of the department and an alumni to the institute. Mrs Y Indira Priyadarshini and Mr. S. Aslam Shareef, faculty of the department together were the organisers of the webinar. Around 350 students of both the branches from I, II& III year were the participants. The webinar received good response from the student participants and was conducted through Zoom. The speaker has focused on the technical and programming skills required in the initial stages of the webinar which followed an interactive session. The speaker was very keen in answering all the queries raised by the audience. On the whole it was a very informative and interactive session. The speaker received very good response from the audience and the head of the department appreciated Ms Iram Waseem for having taken time to encourage and enlighten her juniors.

ACCENTURE

I am the first batch student of RCEW .Currently whatever the position i am there in the society ,this is because of my college only . RCEW is the best college where we learnt, not only the education but also the ethics to survive in the society.we had a very good and efficient faculty whose teachings helped us to indulge the interest in the subjects, co curricular activties and also they are very friendly with whom we felt free to discuss even our personal issues and get the solutions for the same.I am the 2012 passed out , the year where there is a huge down in the IT ,still our college management able to get the placements from TechMahindra and i placed in the same ,which laid good basement for my professional career as well

I am also a hosteller and the management took every student responsibility as their own family and gave us good environment to live. Overall i can say the time we spent in RCEW is the life time cherishable moments, which gave us a good foundation for our career in both professionally and personally.

I love my college life. I whole heartedly say that RCEW moulded me into a better individual to the extent where I'm able to believe in myself.The Principal, the faculty and the lab technicians helped us a lot in understanding the subjects and a way to lead life happily in any situation.I met incredible people and was able to find my passion while being independent.All the four years, we never missed a chance to prove ourselves. We attended many seminars and participated in many activities which helped us to be always sportive and challenging. Training and placement program held by the college is very helpful for which I would like to thank the administration, the contribution they made for the successful career of every student is priceless.Choosing a women's college never bothered me because my college never differentiated men from women. But always taught to be equal in society.

My name is M.Vani. I have completed my graduation in computer science engineering in the year 2014-2018.I am feeling very proud for completed my studies inRavindra college of engineering for women because the lectures teaching was very good and they were friendly with students and they can clear all the doubts for us. I not only completed our studies we have lot of cultural activities conducted by our college like women's day etc.. coming to placement we got lot of placements for our college. RCEW gives lots of opportunities to prove ourselves. We can gain lots of knowledge by reading the books that are provided in our library. Now I am enjoying my present days because I got placed in a company called CAPGEMINI.

I am Manvitha, I have been here from 2013 to 2017. From the first visit through to typing this out my overall college experience has been quite enjoyable. This is because, the staff are friendly, professional and understanding to any needs that you may have. The facilities within the college campus are good.I have had brilliant time, meeting new friends throughout my time here and growing as a person both academically and in my personal life. I have also gained qualifications and my prospects for the future are looking good.

I am P.Bhavya from CSE Department. It is the best days of my life because it's a turning point in my career where here I experienced success as well as a failure too. I still remember that the first day of my college where my mind is full of questions and confusion which field I have choose where I have stepped in every thing is new to me.How to behave with new people but eventually things are in right place. I have to make a friend's within 1 week even now they are still my best friends. I work very hard in the first year I expected more marks but I fail to achieve my expectations.I made a challenge to myself that this failure has to become a stepping stone for my success. Yes this challenge makes me success. I am on of the topper in my class for every semester. its happened not only about my hard work it also happens about my faculty support and guidance. If you have a zeal to learn new things,Faculty will always support you to achieve your goals.The things which I learn in college days are to participate each and every moment either it may be sports for entertainment or it may be Quizz to examine a knowledge power.I learn to be a unique, discipline,how to overcome a defeat etc.The other part of my college life is bunking the classes and making fun with my friends in the class and sometimes getting punished with the facility. Every year we used have Mugdha celebrations and during this time everyone will enjoy by playing games, participating cultural activities. In Final year we have so Many Trainings, interviews, separate classes on latest

technologies.The days will move fastly.We have best Training and placement classes when compared to other colleges.Finally, I got good percentage as Per my expectations,placed in my dream company Infosys and left our college.

Iam K.Prathyusha studied in RCEW. I have learned how to work without Opportunities like when we were at the end of graduation with very less jobs outside during that time, even then they showed us a way to get jobs 😉. Which is more imp in life...Overall all the money that we pay to the college is really worth it and the placement, college life, friends, and all the memories do pay the students back in their life.

My name is P. Divya. I have completed my graduation in computer science engineering in the year 2014- 2018. I am feeling very proud that I have completed B.tech in Ravindra college of engineering for women because the way that the lectures will teach us was very good and they were friendly with students and they can clear all the doubts for us. They were very supportive and encouraged us to develop our career in a right way. We have gone through a professional practice for all the experiments. RCEW provided a lot of campus placements to prove ourselves. Now I got placed in a company called COGNIZANT.

My name is Sareddy Chandra Rekha. I pursued my graduation in Ravindra College of Engineering for Women. First, my experience in college has given me a chance to sharpen my skills in my field of choice.College life poses a lot of challenges in front of us. It makes us stronger and teaches us to fight our own battles. It also makes us serious about our careers. All the faculties here are qualified and experienced andvery co-operative. And they present educational process/programs in a compatible manner. They want more to reach us than to teach us.Another college life experience I have seen that fun and sincerity was well balanced. Annual day celebrations, fests and sports are other aspects of college life. It creates so much excitement and those are the memorable events in student's life.I feel proud that I was a student of this college, which is equipped with adequate library and other facilities to reach my goals.I thank each and everyone for giving me a great platform to stand up on my feet.
